

Intelligent Pipe
Processing Systems

Adescor

Adescor Your Partner in Pipe Processing Innovation

Adescor specializes in plastic pipe processing systems, offering a full range of integrated solutions from pullers to gasket installation. Leading the field in pipe processing systems we're leveraging automation to meet evolving customer need. Our systems are designed to maximize productivity while minimizing operator touch.

Innovation and Excellence

Advanced Downstream Equipment Specialists Corporation, known as Adescor, was founded in 2004. With over 20 years of proven expertise in the corrugated pipe industry, Adescor has developed deep, hands-on applications knowledge in the processing of plastic pipe. This experience has earned the company a strong reputation for delivering solutions that are effective, durable, and easy to operate.

Advanced Technology

By combining advanced technology with smart operator interfaces, Adescor delivers the right information at the right level, more detail for experienced operators and step-by-step guidance for others. This approach redefines ease of use and performance in plastic pipe processing equipment. The outcome is higher throughput, consistent quality, and a significant increase in overall production efficiency.

Partnership-Driven

We believe the best results come from true collaboration. We work side by side with our customers, from concept ideation through production in your plant. Startup is only the beginning. Where others finish, we continue by providing operator training, responsive troubleshooting, readily available parts and dependable service. Our focus is on your success, with solutions and support that drive performance today and growth for the future.

learning &
improvement

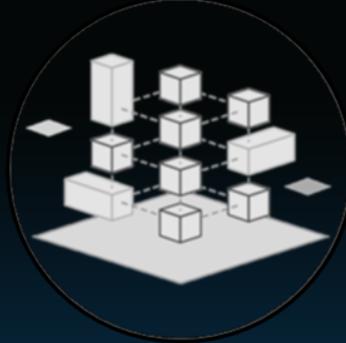

End to End
thinking to
maximum
throughput

Our Product Development Principles

Product Safety

- Industry leading Safety and Quality

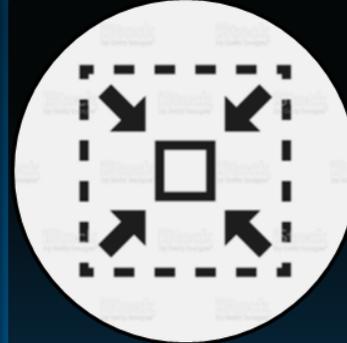

Modularity & Standardization

- Configurable to customer plant / product flow

Effectiveness

- Reduced operator touch (simplicity when required)
- Reduce product and operator waiting time
- Eliminate over processing
- Ease of use and user-friendly UI
- Reliability and robustness

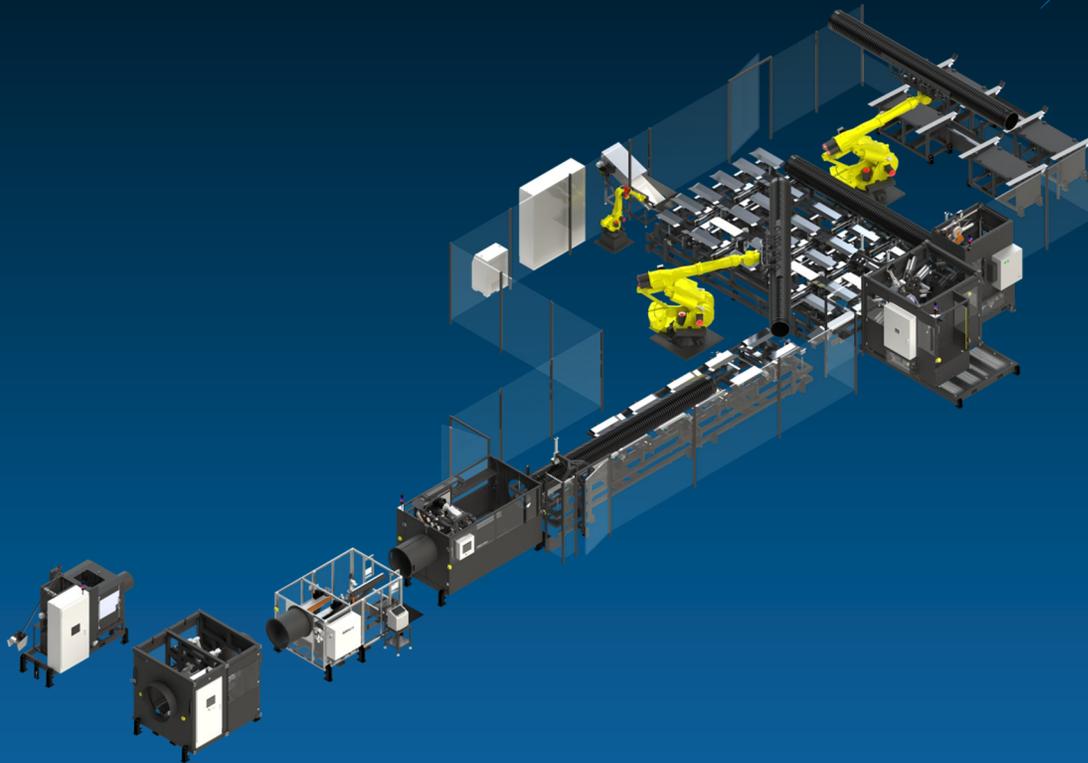

Compact Design

- Optimize floor space (most valuable area in the plant)
- Reduce E2E transportation
- Optimize Operator motion
- Ease of maintenance

E2E Integration

- Production data for improved operational effectiveness
- End to End thinking about the production of our customers product

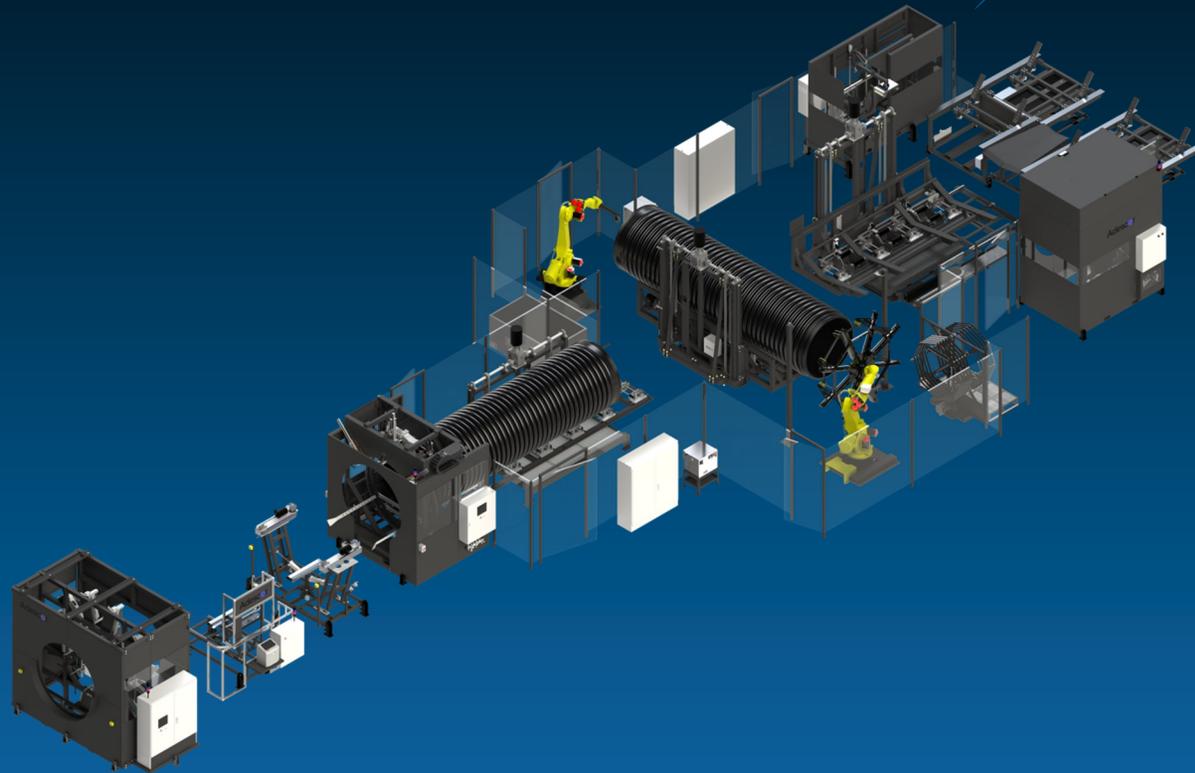

Features

- Ø100 - 450 mm (4 - 18in) pipe
- Up to 15 m/min (49 ft/min)
- Configurable for side or end exit
- Fully enclosed safety system, no operator entry required
- Detection of irregular pipe length or weight
- Minimal changeover
- PSHSR Compliant
- CSA Certified

U.S. PATENT PENDING
APPLICATION NO. 63/415.732

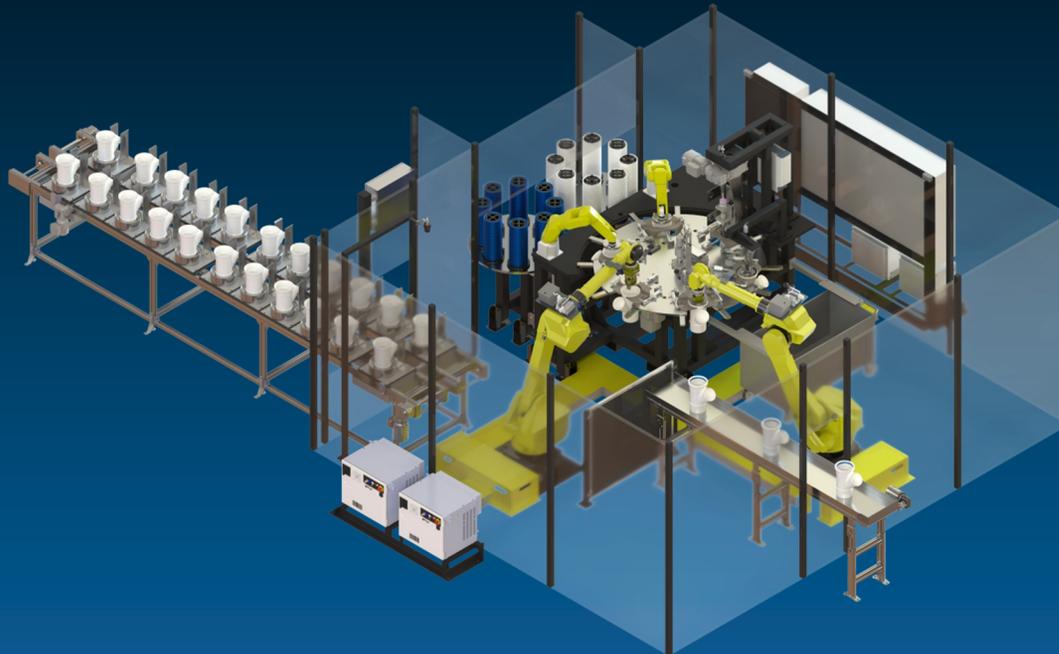

Features

- Ø75 - 375mm (3 - 15in) pipe
- Up to 45 m/min (150 ft/min)
- Max coiling speed 61 m/min (200 ft/min)
- Automatic coil start and re-start
- Automatic coil strapping
- Automatic intermediate strapping
- 12 final strapping locations
- Automatic pipe cut
- Automatic coil weighing
- Automatic strap supply and take-up
- PSHSR Compliant
- CSA Certified

¹Customer to specify width at time of order

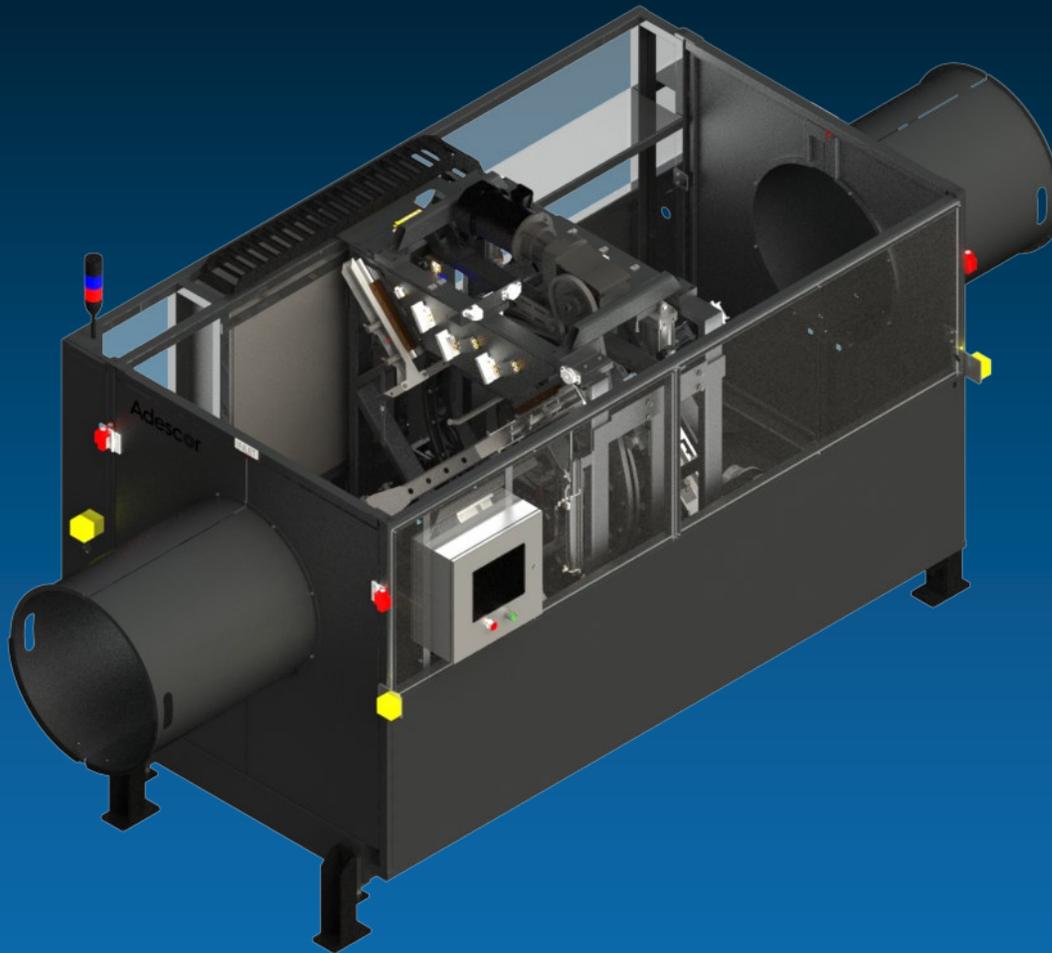

Features

- Ø100, 150, 200 mm (4, 6, 8 in) pipe
- Up to 8 ppm
- Handles multiple fitting types and shapes
- Fully automated assembly
- Pre-Assembly Validation
- Quality Inspection
- Finished part marking
- Available with Robotic or Gravity Unload
- Minimal changeover
- 1-2 operators depending on options
- PSHSR Compliant
- CSA Certified
